

BLACK BEAUTY™

What You Seed is What You Get!

- Extensive, deep root systems that grow up to 4 feet deep!
- Incredible dark-green color
- Naturally insect resistant
- Uniform, upright growth habit
- Grown by leading sod growers across the U.S.A.

Your lawn is only as good as the grass seed it starts from...and none on the market rival the performance of **Black Beauty**. **Black Beauty** grass seed mixtures contain the most drought and heat tolerant varieties in the industry. With roots that can grow up to 4-feet deep and a waxy leaf coating (like the skin of an apple), **Black Beauty** preserves moisture and limits evaporation. It also withstands heavy traffic, insects, diseases and thrives in sunny or shady areas. For all of these reasons, **Black Beauty** is the choice of America's top sod growers. **Black Beauty** is sure to provide you with a healthy, dark-green lawn for many years to come. Remember, "Once you've seen a **Black Beauty** lawn, you'll never forget it."

Homeowners Love Their Black Beauty Lawns!

Research makes the difference!

Grown by leading Sod growers across the U.S.A.
Johnson Sod Farms, Deerfield, NJ, grows Black Beauty.
